Limited 1st Ray mobility

Hoka Arahi
Hoka Clifton
MTB (on-line)

*shoes that work well with PRI Orthotics

Qualities of a Good Shoe:

Heel counter does not fold in

Shoe bends in the toe box easily and not in the middle of the shoe. Toe box bend should not be too stiff.

No outside heel give

Heel height should be symmetrical

Qualities of a Poor Shoe:

1. Your shoes should feel comfortable right away. If you feel like you have to "break them in," it's not your shoe.
2. When walking you should be able to "sense" your heel, arch and big toe.
3. Your P.T. will make sure PRI objective tests are negative with your new footwear.
4. You can use the above criteria when looking for any type of shoe. Casual, walking, basketball, etc.
