 Running Company, good for  
 tibia varum or calcaneal instability)  
 New Balance 1540 V2 (most stable)

- **\*\*Caution with patients that have increase calcaneal inversion/supination/tibial varum**  
 Neutrality in the pelvis with PRI tests determines which shoe works for the patient.

### Signs of a Poor Shoe:

### Signs of a Good Shoe:

Heel counter does not fold in

Shoe bends in the toe box easily and not in the middle of the shoe. Toe box bend should not be too stiff

No outside heel give

Heel height should be symmetrical
